

# AKS-1

Aksay Silah, has 30 years of experience about producing of shotguns and all different inside parts . AKS Series design has started with the all machining and gunsmithing experience. Design and R&D process has taken over than three years, and still continuing. All parts, working system and other components are designed high precision and manufactured meticulously.

AKS series are not depends on traditional specs and lines. With gauge optimization, processing methods and assembling periods, AKS series become together technology and tradition with the all details.

Monoblock steel raw materials processed from high quality, in our brandnew cnc machines and controlled by our qualified engineers. All inside parts are processed from block steel material and make hardness for more durability.

AKS Series, are work with same inside parts for every gauge. Common structure, gives us more standardization and flawless work in our products. For clear assembling, parts standardization of our products 100% finished from our CNC machines

Gauge	12 - 20 , 3" 76 mm
Receiver	Monoblock Steel
Barrel Material	Processed From Steel
Choke	M. Choke / Slug
Barrel Length	47 - 61 - 71 cm
Working System	Hidden Hammer Break Action

# AKS-2

AKS Series, are work with same inside parts for every gauge. Common structure, gives us more standardization and flawless work in our products. For clear assembling, parts standardization of our products 100% finished from our CNC machines

Gauge	.410 , 3" 76 mm
Receiver	Monoblock Steel
Barrel Metarial	Processed From Steel
Choke	M. Choke / Slug
Barrel Lenght	47 - 61 - 71 cm
Working System	Hidden Hammer Break Action
